

## **Claim Amendments**

1-202 (cancelled)

203 (original). A folded sheet metal fastener comprising:

a top section having a top engageable continuous hole;

a bottom section having a bottom engageable continuous hole;

at least one side section, the top section and the bottom section being connected by the at least one side section; and

a front snapping segment and a back snapping segment, the snapping segments connected to the top section.

204 (original). A fastener as defined in claim 203, wherein at least one of the snapping segments comprises a portion selected from anti-opening portion, anti-sliding portion, and a combination thereof.

205-216 (cancelled)

217 (original). A vehicle comprising objects connected with a folded sheet metal fastener, the fastener comprising:

a top section having a top engageable continuous hole;

a bottom section having a bottom engageable continuous hole;

at least one side section, the top section and the bottom section being connected by the at least one side section; and

a front snapping segment and a back snapping segment, the snapping segments connected to the top section.

218 (original). A vehicle as defined in claim 217, wherein at least one of the snapping segments comprises a portion selected from anti-opening portion, anti-sliding portion, and a combination thereof.

219-250 (cancelled)

251 (new) A folded sheet metal fastener as defined in claim 203, wherein the fastener comprises only one side section

252 (new) A folded sheet metal fastener as defined in claim 204, wherein the fastener comprises only one side section.

253 (new) A folded vehicle as defined in claim 217, wherein the fastener comprises only one side section.

254 (new) A folded vehicle as defined in claim 218, wherein the fastener comprises only one side section.

255 (new). A combination of objects connected with a folded sheet metal fastener, the fastener comprising:

a top section having a top engageable continuous hole;

a bottom section having a bottom engageable continuous hole;

at least one side section, the top section and the bottom section being connected by the at least one side section; and

a front snapping segment and a back snapping segment, the snapping segments connected to the top section.

256 (new). A combination of objects as defined in claim 225, wherein at least one of the snapping segments comprises a portion selected from anti-opening portion, anti-sliding portion, and a combination thereof.

257 (new). A combination of objects as defined in claim 255, wherein the fastener comprises only one side section.

258 (new). A combination of objects as defined in claim 256, wherein the fastener comprises only one side section.
